## Omniceil.com and Turbostaff.com Partner to Provide Staffing Services for Healthcare Industry

### Companies Combine Efforts to Link Buyers and Suppliers through Commerce One's MarketSite™ Global Trading Portal

PALO ALTO and PLEASANTON, Calif., June 8, 2000  
 Omnicell.com and Turbostaff.com today announced a partnership to provide staffing services to buyers in the healthcare industry, utilizing the Commerce One, Inc. (NASDAQ: CMRC) MarketSite™ global trading portal (www.marketsite.net).

"We are delighted to partner with Turbostaff.com," commented Shelly Asher, president and CEO of Omnicell.com. "The partnership provides our OmniBuyer customers access to Turbostaff.com's staffing services and supports our vision of meeting the complete purchasing needs of healthcare facilities."

Omniceil.com provides e-commerce services that enable hospitals and healthcare suppliers to conduct commerce over the Web, improving the cost efficiency of the purchasing process by providing Internet access to product information, pricing, availability and order status, and enabling online buying and selling. Turbostaff.com provides a marketplace for buyers and suppliers of staffing services, automating the service supply chain from requisition and sourcing to billing and payment collection that drives cost savings throughout the entire service supply chain. The partnership will allow both companies to utilize their respective domain expertise to provide the healthcare industry with the premier solution in procuring and managing staffing services.

"We are excited to be working with Omnicell.com to provide the healthcare industry with an efficient and high quality tool to manage staffing solutions," stated Michael Carreno, president of Turbostaff.com. "Our services offering will add tremendous value to a typically inefficient, manual staffing procurement and management process, providing benefits to both buyers and suppliers."

"We believe that the dynamic combination of Omnicell.com's healthcare-specific supply chain expertise, Turbostaff.com's staffing services capabilities, and Commerce One's market-leading technology promises great benefits for a large and growing customer base in the healthcare industry," said Chuck Donchess, executive vice

**Forward Looking Statements**

Certain statements made in this press release by Commerce One are not historical facts but are "forward looking statements" and may involve risks and uncertainties which could cause actual future results to differ materially and adversely from those anticipated by such statements. Included among the factors that could affect Commerce One's performance are: international and domestic general economic conditions; fluctuations in operating results; its ability to effectively manage future growth, to retain and efficiently integrate its executive management team, and to identify, hire, train and retain, in a highly competitive market, individuals highly skilled in the Internet and its rapidly changing technology; significant revenue concentration in a limited number of clients; the lack of long-term contracts; its ability to enter into, and retain its existing, strategic relationships; market acceptance, rapid

technological change, a decline in Internet usage, and intense competition in its market; its ability to effectively integrate the operational, managerial and financial aspects of future acquisitions; and its ability to obtain financing when required. For a discussion of these and other risk factors that could affect Commerce One's business, see "Risk Factors" in Commerce One's filings with the Securities and Exchange Commission, including its annual report on Form 10-K for the year ended December 31, 1999 and its quarterly report on Form 10Q for the quarter ended March 31, 2000.

## Enterprise Buyer - the Next Generation of E-Procurement

Organizations have quickly warmed to the idea of saving time and money by procuring indirect goods such as office supplies and computer equipment via the Internet. Substantial though these savings are, the procurement of direct goods through the Internet represents a much greater savings opportunity for many industries. Direct goods are the components of manufactured products. The custom specifications for these products and the bills of material make the direct goods procurement process considerably more complex than that of indirect goods.

### The Solution for Direct and Indirect E-Procurement

Commerce One Enterprise Buyer™ is an e-procurement solution that makes it possible to more effectively manage direct and indirect goods purchasing over the Internet. This comprehensive solution, developed jointly by Commerce One and SAPMarkets, supports simple indirect purchasing and manages the complex design, planning, engineering, and specification processes of direct procurement. It also serves as an on-ramp to multiple e-marketplaces, giving buyers access to business services and products from a worldwide selection of suppliers.

### Tools that Match Business Needs

Enterprise Buyer is available in two editions - Desktop and Professional. The Desktop Edition gives the corporate buyer a self-service method for purchasing indirect supplies online. It streamlines the procurement process and workflow by automating requisition and purchase order generation, minimizing data errors, and routing all documentation for approvals. Buyers can access preferred catalog products and services through a multi-supplier catalog managed by their company, or directly from a supplier's web site. They can also save money by restricting purchases to pre-approved vendors with preferred pricing, and establishing business rules that enforce individual and departmental limits.

Generating requisitions and purchase orders is easy. Users simply add items to a checkout list and Enterprise Buyer does the rest. It automatically generates and routes the requisition for approval. Once the requisition is approved, Enterprise Buyer creates the purchase order and sends it to the supplier via the Internet.

The Professional Edition combines all the indirect

## BEST AVAILABLE COPY

procurement capabilities of the Desktop Edition with advanced direct goods procurement functions. This powerful solution matches internal supply chain needs with external resources. It automates the full range of business processes required for buying direct goods, including bills of material, materials management, contract buying, configured goods buying, warehousing, and business intelligence. It also manages the collaborative design, sourcing, production planning, and vendor qualification processes. Using Enterprise Buyer Professional Edition, the buyer's and supplier's engineers can communicate specifications and objectives to arrive at designs that can be delivered faster and more efficiently.

### On-Ramp to Multiple E-Marketplaces

The Enterprise Buyer open architecture enables buyers to easily integrate either edition into their existing enterprise resource planning system and link the entire procurement process to any e-marketplace. This connection gives buyers access to business services and products from more than 100,000 suppliers around the world. And they receive content that is detailed, easy to process, and enhances procurement decisions.

### The Standard for Next-Generation E-Procurement

Enterprise Buyer sets the standard for next-generation e-procurement by delivering the tools to effectively manage the indirect and direct procurement needs of any organization. Both editions make e-procurement a reality for users with simple indirect procurement needs, while the Professional Edition also meets the needs of industries involved in direct goods procurement. To learn more about how Enterprise Buyer can enhance your business, please go to our [Solutions section](#).
